

Testing

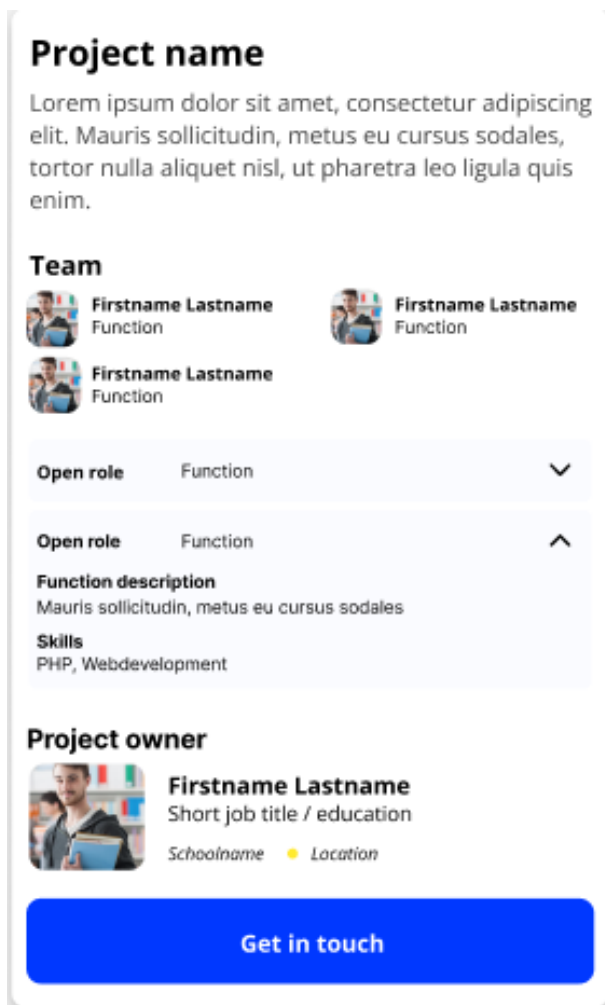

1. 5 Second Test

We gathered a couple of students and separately showed them a few screens from our app.

Task: Show them a screen from our app for 5 seconds, then they describe what they remember

Goal: To see what attracts the most attention and can be remembered

Used screens for this test:

Users answers for the 1st screen:

Vlad: "I remember the blue button at the bottom and a picture"

John: "I saw a blue button with Get in touch text with some roles in the middle"

Patrick: "There was a project name at the top and a blue button at the bottom"

Users answers for the 2nd screen:

Vlad: "There was a transparent photo with yellow somewhere and a blue button on the bottom"

John: "I remember a photo, a blue button and a navigation bar on the bottom"

Patrick:" I remember icons with a transparent photo with a blue button"

With these results we can conclude what we wanted. That the blue button pops up to the white background.
